

ETERNITY

LIFE CLINICS

elifeclinics.com Whitepaper

April 2022

INTRODUCTION

Eternity Life Clinics (ELC) is an unprecedented medical project that brings together the best scientists and advanced technologies from around the world.

The key objective of ELC is to conduct research to achieve immortality. While millions of people only dream of immortality, we have set this goal and will make every effort to make it a global reality.

One advantage we possess is foundation, we already operate successful businesses in the medical and legal spheres.

The basis of Eternity Life Clinics is a program that helps people with diseases of any complexity to find the highest quality treatment in our clinics around the world.

ABOUT THE PROJECT

Here are a few highlights of our project:

- The construction of a network of clinics around the globe combined with centers to conduct scientific research in the field of life extension and immortality.
- The financing of scientific research outside the walls of our institutions.
- The creation of a networking medical platform using Blockchain technologies to support doctors and medical professionals
- The platform will help people in need of medical care, counselling and high-quality innovative treatment of diseases.
- The introduction of high-tech medical equipment based on a global database of scientific and technological knowledge and our specialists' developments.

Project Objectives

- Create a global network of medical centers, the Eternity Life Clinics.
- Conduct research to study a wide range of human diseases.
- Organize and support medical tourism.
- Development and production of portable medical equipment.
- Register our patents in the EU, North America, Australia and the Middle East.
- Develop and implement the Blockchain medical platform.

Our Offer

The main goal of the project is to provide healthcare for our patients. The approach of Eternity Life Clinics (ELC) significantly differs from typical clinics, because our task is not just to treat ailments. We are committed to tracking and preventing diseases by introducing the latest analytical technologies that will track the development of the patient's disease. Technologies of this principle of action already exist. Now it remains only to wait for the moment when the first clinic of the Eternity network opens and we will be able to show in practice how it works.

In the next few years, we plan to expand the list of medical services following the international standards of the corporation, so that our patients have the opportunity to use the highest level of medical care. We offer our patients the services of highly qualified specialists in various fields that are well-versed in modern medical technologies and techniques using the latest diagnostic and therapeutic equipment complemented by world class levels of service, professional care and attention.

Our mission is to protect the health of patients and provide high-quality and effective treatment. Early detection of the problem and timely treatment is a guarantee of a successful recovery to health. We want to rebuild the healthcare system so that diseases are detected at a very early stage. It is the preventive medicine orientation - the main task of healthcare in European countries, that will be able to ensure success in the fight against diseases. The advanced equipment that the clinics will possess will make it possible to accurately diagnose and identify the risks of oncological, cardiovascular, gastroenterological, bronchopulmonary, and bone and joint diseases.

Additionally the project will focus on research and the introduction of new technologies to monitor the health of patients.

Our research centers will specialize in:

- studying organisms with the maximum lifespan;
- prosthetics and robotics;
- neuro-technologies;
- bioengineering;
- organ transplantation;
- 3D printing of organs;
- brain research.

Maintaining the trust of our patients and partners is key to our continued success. To protect private information, we will use Blockchain technology. The adoption of this technology has successfully been proven in many areas involving complex databases.

To create such an innovative project as Eternity Life Clinics, we will use modern technologies to the maximum, including Blockchain. It will help us secure confidential information about our customers, as the main priority is taking care of people who will entrust us with the most valuable thing - their health.

We understand that creating a project of this magnitude takes time. Therefore, until the moment when you can personally come to our clinics, we have decided to create not just a prototype, but a whole virtual world in which an e-hospital will exist.

This is made possible by playing on the Blockchain in the Play-to-Earn (P2E) segment. *(This is a new term for video games, where gamers can earn cryptocurrencies and NFT tokens through their gaming activities.)*

TEAM

Eternity Life Clinics has gathered together extremely high-level doctors and researchers in such fields as transplantology, bioengineering, genetics and gerontology.

The creator and ideological inspiration is **Denys Chernyshov, CEO** of the law firm Eternity Law International. A lawyer and a person who can unite the right specialists, find investors for scientific research, build clinics to a world class level.

We believe that everyone should do their job efficiently and professionally. The main task for the doctors is to teach the patient to be healthy as we implement this project.

Our Team

Denys Chernyshov | Founder & CEO

Andrey Klymenko | Chief marketing officer (CMO)

Asya Honcharuk | Chief communications officer (CCO)

Ivan Talaichuk | Chief Financial Officer (CFO)

Nikita Zakharov | Project manager (PM)

Tatyana Tereshenko | Head of Customer Relations Department

Anton Martynets | Chief technology officer (CTO)

Aleksandr Russalov | Senior CGI Artist and Animator

Angelina Chulipa | UI/UX Design

Nikita Beihul | Chief legal officer (CLO)

Salome Mgaloblishvili | Chief research officer (CRO)

We cooperate with the international company Eternity Law International, which provides comprehensive legal support for ELC. A team of professional partners with significant experience in legal practice, an impeccable business reputation in the legal services market, dealing with all legal issues related to the registration of legal entities in the countries where the company plans its activities, is engaged in obtaining all licenses necessary for the activity, drafting contracts for cooperation and contracts with clients of the clinics.

ROADMAP

Our path contains a number of stages that will be revealed as the project develops. Since our goals and technologies are protected by medical patents, they are disclosed only to persons who have passed project verification and have become an active participant.

Q1 January/February 2022

1st Quarter

- Creation of a technical document
- Launch and registration of social networks
- Launch of a website elifeclinics.com
- Team formation

Q2 March/July 2022

- Legal registration
- Opening an office
- Launch a website with the project's knowledge base
- Launching a YouTube channel
- Marketing and product promotion

Q3 August/September 2022

2nd Quarter of the year

- Formation of the medical council
- Search for startups and Researchers (Partnership)
- Presentation of plans for the construction of a research center and clinic
- Media coverage
- Publication of Development Roadmap V. 1*
- Creation of an ecosystem (token issuance and coverage of blockchain networks)
- The release of the beta version of the game in the sandbox

CONTACTS

We are building the Eternity Life Clinics project on an innovative basis to discover a new generation of medicine for you, which will not only cure diseases, but also ensure immortality for humanity. Please join our community and learn more about our project.
